SUMMARY

QA Engineer with 3.8+ years of experience in Manual, API, and Automation Testing across Capital Markets, Wealth Management, Application Modernization, and AI-driven platforms. Hands-on experience in Functional, Regression, Integration, Smoke, Sanity, SIT, and UAT testing with expertise in Playwright, Mabl, Postman, SQL, and MongoDB. Skilled in API validation, backend testing, defect management, release validation, and Agile software delivery.

TECHNICAL SKILLS

- Testing: Functional, Regression, Integration, System, Smoke, Sanity, SIT, UAT, Exploratory Testing
- Automation: Playwright (JavaScript), Page Object Model, Mabl
- API Testing: REST APIs, Postman, JSON Validation, Response Validation
- Database: SQL, Joins, CRUD, MongoDB
- Tools: JIRA, Rally, Confluence, TestRail
- Programming: JavaScript, Basic Java
- Methodologies: Agile, Scrum, SDLC, STLC

PROFESSIONAL EXPERIENCE

Spire.ai | Software Tester II

Product: **AI-driven** Platform | Nov 2025 – Present | Bengaluru

- Designed and executed test scenarios and test cases for AI-driven web applications based on business requirements.
- Performed Functional, Regression, Integration, Smoke, Sanity, and UAT testing across Agile sprint releases.
- Validated REST APIs using Postman by verifying requests, responses, status codes, authentication, and JSON payloads.
- Developed UI and API automation scripts using Playwright and Mabl to improve regression testing efficiency.
- Performed backend validation using SQL and MongoDB to ensure data integrity.
- Reported, tracked, and verified defects using JIRA, collaborating closely with developers for timely resolution.
- Participated in sprint planning, defect triage, release validation, and production readiness activities.

Tata Consultancy Services (TCS) | Software Tester I

Project: SEI Wealth Management Platform (Capital Markets) | Mar 2022 – Apr 2025 | Bengaluru

- Designed test scenarios and executed Functional, Regression, Integration, System, SIT, Smoke, Sanity, and UAT testing.
- Validated end-to-end business workflows within Capital Markets and Wealth Management applications.
- Performed backend validation using SQL queries to verify financial transactions and database consistency.
- Executed REST API testing using Postman and validated request/response payloads.
- Logged, tracked, and retested software defects using Rally and JIRA.
- Collaborated with Business Analysts, Developers, and QA teams throughout Agile sprint cycles.
- Supported release validation, production smoke testing, and test reporting.
